Name of PV system in Solar.web or Data source ID:

To find here: Solar.web - Settings - Components - Data source ID

Size of installation:

kWp

Location:

Annual production:

kWh

Date of commissioning:

Module type & area:

Self-consumption rate:

% *(What levels of energy consumption does the system cover?)*

Self-sufficiency rate:

% *(How indendent are you from public grid?)*

Brief description of the customer and the system:

(What is the business of the system owner, why did they invest into PV, where is the system located in the building, what is it being used for?)

Was there a unique challenge when designing or installing the system? Why was Fronius the best choice for solving this problem? (Shading, climate, difficult installation surrounding, repowering, MicroGrid, PV-Genset...)

E-Mobility and heat generation:

Wall Box

System and type

Fronius Ohmpilot

Heat generation

System and type
